

1. CONNECTING TENANT DEVICES TO SMART HOME – 8 DALES WAY

Table of Contents:

- 1.1 WIFI Password
- 1.2 Doorbell and Intercom
- 1.3 Control Touch (Lights, AC, Doors and Blinds)

1.1. WIFI Password

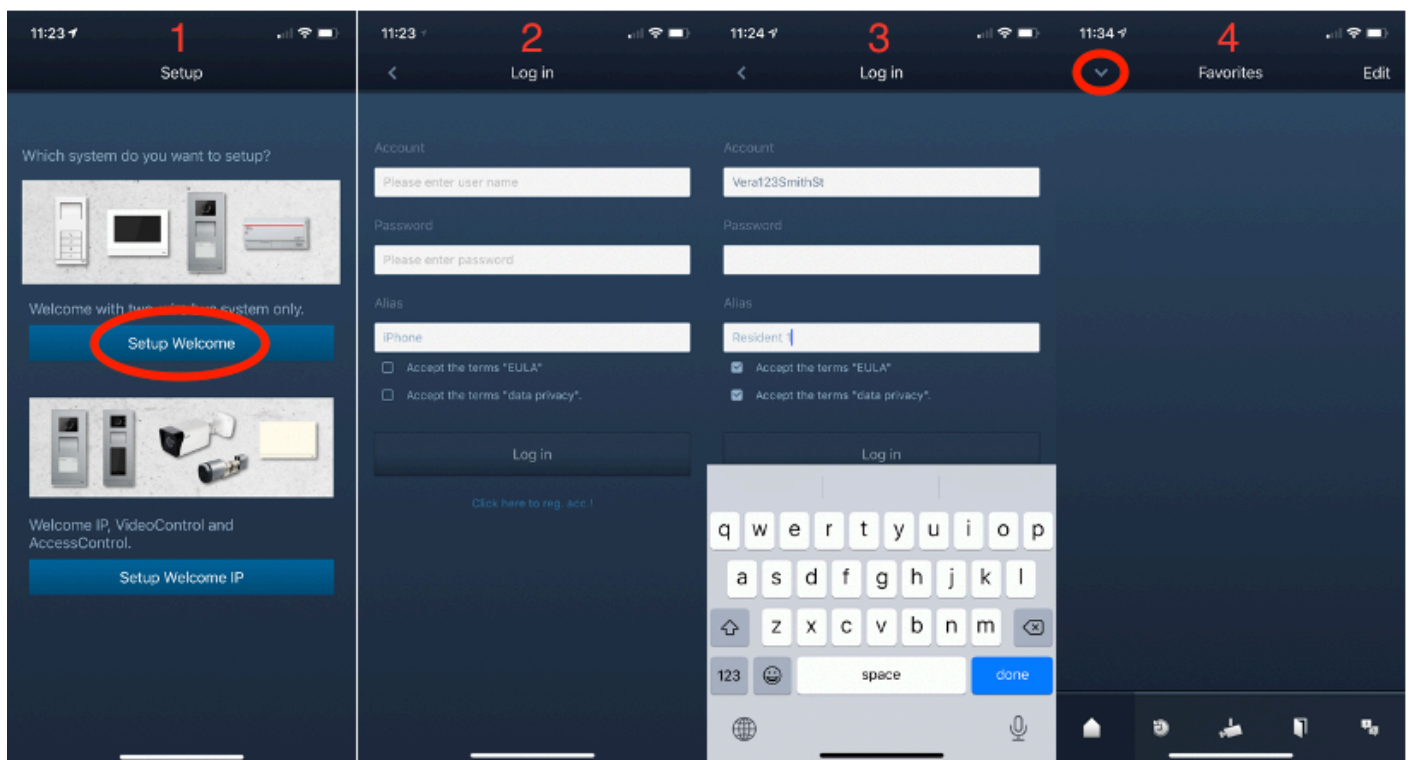

SSID: TelstraC5C9C6

Password: c5frb97f27

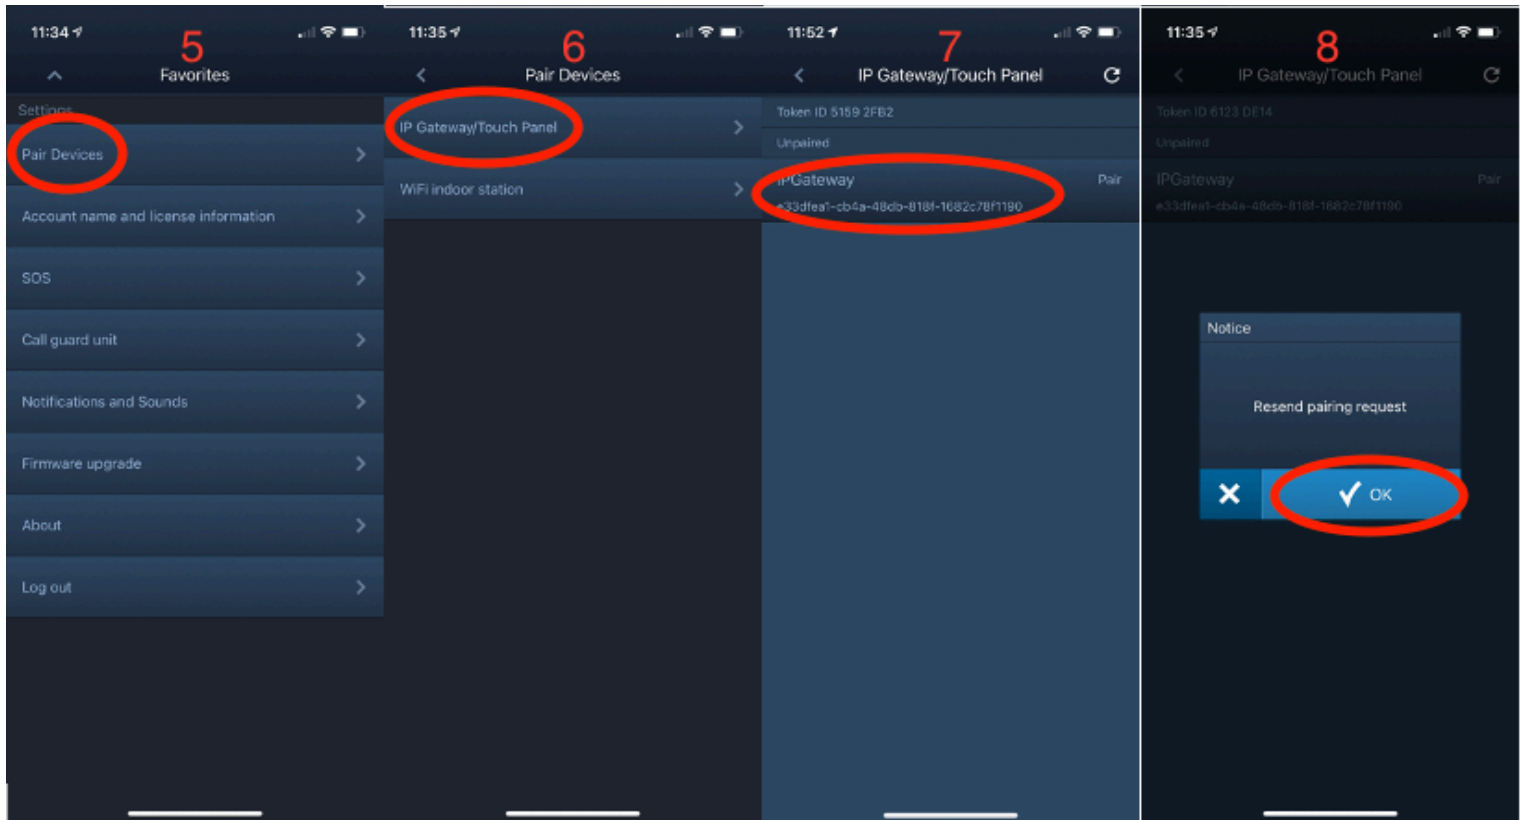

The password is also shown on the bottom of the modem which is in the cupboard above the fridge

1.2. Doorbell and Intercom

1. Install the ABB welcome application on the user's device and select "Setup Welcome" on apps homepage
2. Account login page will appear
3. Log into account using the following details
 - a. Account: Vera8DalesWay
 - b. Password: d5MwK2H7!!
 - c. Alias: Tenants name or room number + the devices name (e.g. John's Phone)
4. Click done then select the menu down arrow

5. Select "Pair Device"
6. Select "IP Gateway/Touch Panel"
7. Write down the Token ID, you will need this later and then Select "IPGateway"
8. Click "OK"

9. In an internet browser on a device that is connected to the houses WIFI, type the following address into the address bar or click this link

<http://192.168.0.200/>

You should then see the page below. The page should already be logged in, but if it is not the login details are shown below:

Username: admin

Password: d5MwK2H7!!

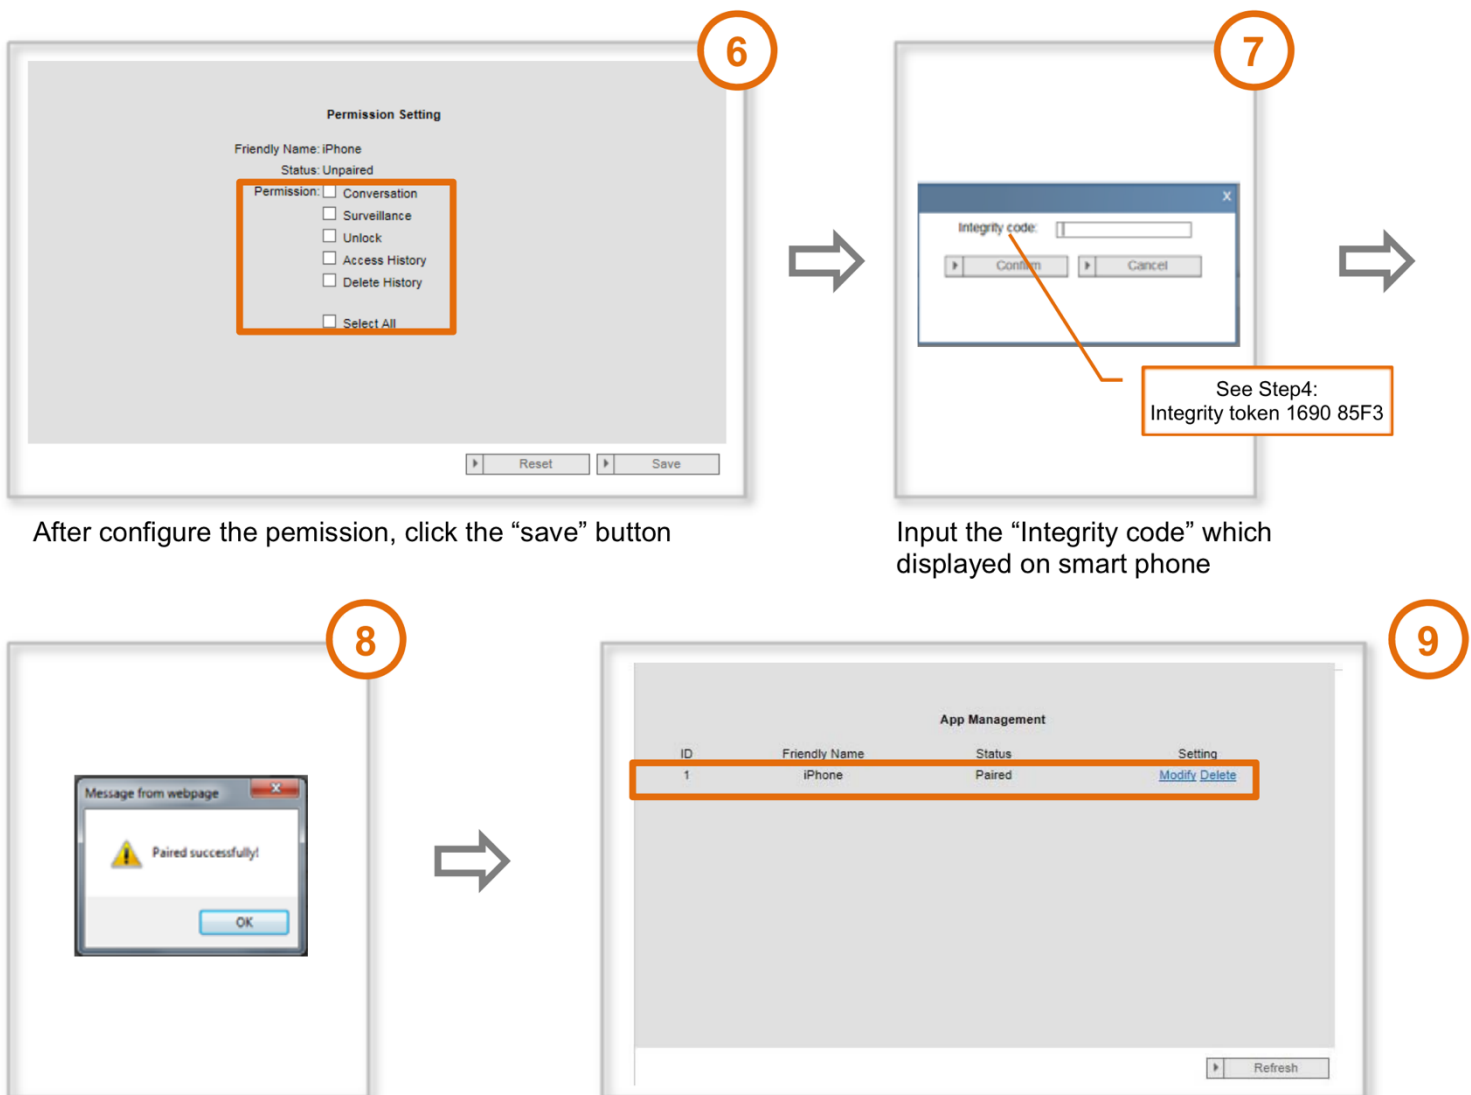

10. Click on “App Management” which is in the list of the left
11. Click on the “Handle” link for the device you are adding.

5

App Management			
ID	Friendly Name	Status	Setting
1	iPhone	Unpaired	Handle Delete

Friendly Name of Smart phone

12. Select the access level for the device. (step 6 in image below)
 - a. The tenant level access should be
 - i. Conversation
 - ii. Surveillance
 - iii. Unlock
13. Input integrity code (step 7 in image below). This is the Token ID that you wrote down from the device in step 7 above
14. Click OK
15. Once the device is paired, it can be removed by navigating back to the app management page using the steps above and selecting delete on the device. This may be required if a tenant moves out of the house.

1.3. Control Touch (Lights, AC, Doors and Blinds)

1. Install the ABB Control Touch app on the device you would like to use. The app icon is shown on the right.
2. Open the app and select "QE Scanner", you will need to allow the app to access the camera.
3. Scan the QR code for the appropriate bedroom or area that you would like to give the device access too. Please note that the bedroom QR codes will give access to the common area assistive tech. The master QR code will give access to all assistive tech within the house.
4. Enter the password relating to this QR code.
5. Once the device has connected, click on the tick and return to the home page.
